

Prof Simon Waddell – Global Health and Infection, BSMS, University of Sussex

❑ Offer: Expertise in mycobacterial pathogenesis (*M.tuberculosis*, NTM), transcriptomics *in vitro* and *in vivo* (RNAseq, NanoString), early drug discovery (whole cell screening, MoA), biofilm models of *in vivo* growth, collaboration with African partners

❑ Would like: Novel biofilm models – *M.tb* or water sources for NTM, methods to image biofilms and bacterial heterogeneity, antimicrobial compounds targeting bacteria in biofilms
